

**Learning Objective**

- To explore and practise the technique of two-point perspective.

**Key Words**

Perspective  
Vanishing point  
Horizontal  
Vertical  
Horizon

● **Step 1 - Knowledge & Comprehension**

Use the internet to find out about two-point perspective. Find and choose an image that you think is a good example of two-point perspective.

● **Step 2 - Application**

Produce your own copy of one of the image that you found in step 1.

● **Step 3 - Analysis**

Look for a real life example of two-point perspective. This could be outdoors or indoors. Think about where the vanishing points are. Look for the parallel vertical lines.

● **Step 4 - Synthesis**

Draw a picture of the scene that you looked at in step 3. It does not need to be coloured in.

● **Extension Task - Evaluation**

How do you think you did on these tasks? What parts were the most difficult? What would you improve if you were to do it again?
